THINK GREEN. BUY RECYCLED.

WHAT IS RECYCLED POLYESTER?

Recycled Polyester yarn is made from post-consumer and post-industrial recycled PET products such as bottle and packaging. Recycled Polyester lowers the demand for new petroleum-based products, thus reducing significantly the carbon footprint.

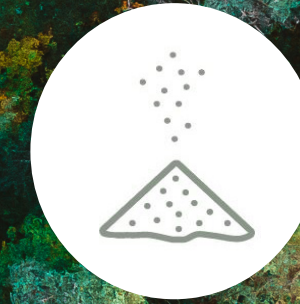

It also diminishes the amount of plastics going into landfill: for every 1 meter of Rejuvenate, 81 one litre bottles are diverted from landfill. In other words, an average of 400 bottles are used on an average sized window.

Our Recycled fabric will not degrade! It is no less colour fast or durable than regular Polyester and we guarantee it for five years!

Are you helping to save the planet by choosing our Recycled Fabric collections? Yes you are!

1.

From wasteful plastic bottles....

3.

Spun into recycled yarn...

To shredded up plastic pieces...

2.

Made into Rejuvenate fabric!

4.

Deserts & Forests

Due to overwhelming popularity for our original recycled innovations, we have crafted a new collection to join our sustainability journey.

Environmental luxury takes shape as our Deserts & Forests Collection. Made from 100% Recycled Polyester - each metre of fabric contains 57 one litre plastic bottles that have been recycled and prevented from entering landfill. Each collection contains one solid drapery coordinating with three sheer fabrics across 5 different colourways inspired by the earth. The sheer and solid line up offers endless options for blending and sculpting in your home, to create unique and sustainably orientated interiors that exist outside the possible combinations available with just regular polyester drapery.

Deserts & Forests have been tested as Fire Retardant AS/NZS1530.2 & 3.
