

THINK GREEN. BUY RECYCLED.

WHAT IS RECYCLED POLYESTER?

Recycled Polyester yarn is made from post-consumer and post-industrial recycled PET products such as bottle and packaging. Recycled Polyester lowers the demand for new petroleum-based products, thus reducing significantly the carbon footprint.

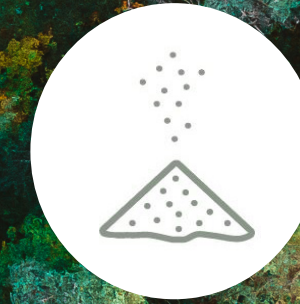

It also diminishes the amount of plastics going into landfill: for every 1 meter of Rejuvenate, 81 one litre bottles are diverted from landfill. In other words, an average of 400 bottles are used on an average sized window.

Our Recycled fabric will not degrade! It is no less colour fast or durable than regular Polyester and we guarantee it for five years!

Are you helping to save the planet by choosing our Recycled Fabric collections? Yes you are!

1.

From wasteful plastic bottles....

3.

Spun into recycled yarn...

To shredded up plastic pieces...

2.

Made into Rejuvenate fabric!
