## CARE INSTRUCTIONS

*Cleaning your blind fabric is essential, not only to remove surface dust and stains, but it will also increase the longevity of your blinds. Use a feather duster, or a vacuum set on low with an appropriate attachment. Always exercise caution when spot cleaning. Use a clean, lint-free cloth or sponge and dip it in warm water. Dry gently with a clean towel. Always make sure to test any cleaning product on a small, discreet section of the fabric. Chemicals will permanently damage your fabric.*
