

LATITUDE

Latitude has been a staple in our range since it was created because its performance and reliability have already been proven. The jacquard weave captures the specific warmth of hand-embroidery, using an irregular stripe to create a more organic feel than a standard, clinical plain. It is a texture designed to look relaxed and unstructured, giving a space a sense of character without trying too hard.

The palette of 18 colors is a curated collection of what actually works, balancing refined neutrals with intentional tones like Saffron and Navy. Woven continuously at a 300cm width, Latitude allows for a seamless finish that is specifically suited for use in custom S-fold applications.

COMPOSITION

95% polyester, 5% viscose

CERTIFICATIONS

Oeko-Tex standard 100

USE
